## PREFACE

As a natural history librarian, I have often been frustrated when trying to locate illustrations by specific zoological artists, particularly those published in serial publications. One particularly frustrating search through the **Proceedings of the Zoological Society of London** led me to a desire to one day create an index to the artists represented in the that journal, but administrative duties, other urgent projects, and personal commitments prevented the undertaking of such a project. Two years ago, Gary Kuris of Garland Publishing asked me for suggestions for bibliographic publications Garland could publish. I jumped at the opportunity. Nothing like a deadline to strengthen one's resolve! But I knew that a full schedule wouldn't permit me to meet the deadline, so I looked around for a co-author: someone who had the necessary bibliographic skills, knowledge of computers, and familiarity with the history of natural history and printing. I didn't have far to look for Bryan Johnson wandered into my office and within half an hour he was hooked.

Together we spent uncounted evenings and weekends as we tested bibliographic styles to best describe the plates, deciding what indexes were needed, and negotiating who would be responsible for what. The one thing we never expected was how gruelling it would be to input and then proofread the long lists of butterflies and shells that appear in a single plate. At one point we began to hate these beautiful creatures. Who could hate a delicate butterfly or a pink-hued shell?

I just looked out at the back garden and saw two young does munching on the phlox; I feel a kinship with the artists represented in the Index. They lovingly and correctly depicted such beautiful creatures, and as the does bound into the woods, I experience the awe and joy that Wolf and Smit must have felt.

## ACKNOWLEDGEMENTS

We wish to thank Garland Publishing and Gary Kuris for their support and indulgence. The plates in this work were photographed from originals in the collection of the Department of Library Services in the American Museum of Natural History by Olivia Bauer and Jackie Beckett of the Photography Studio in the Museum. Phyllis Johnson and Andy Bates are also deeply thanked for their patience with long monologues on bibliographical citation forms and dinners kept warming in the oven. Finally, thanks are also due to Connie Chung, whose early-morning cheerfulness inspired an equally early schedule for the eighteen months of data input and thereby enabled the **Index's** schedule to be kept.

## INTRODUCTION

The development of zoology as an academic discipline in the seventeenth century coupled with the systematic exploration of remote areas of the globe, and the importation of previously unseen species into Europe led to the organization of societies, academies, museums and zoos devoted to the study of zoology. The publications of these institutions are important sources for primary data, for it is in their proceedings and transactions that the newly discovered species were named and described, revisions of classifications published, sightings and geographic distribution of animals reported, and physiological, anatomical and behavioral studies of animals printed. These scientific papers are the basis for the continuing research in zoology today. The illustrations accompanying the scientific papers are of considerable import; not only do they depict the species, but often provide the markings and coloration of the "type" specimen. All subsequent research on a given species is based on the first reported, or "type," specimen.

Until the advent of photographic reproduction in the late nineteenth century, scientific papers were illustrated with woodcuts, engravings and lithographs. It was lithography that revolutionized zoological iconography, since the artist could be his own lithographer, and no longer had to rely on an intermediate to interpret his art. The nineteenth century produced many fine zoological artists and illustrations, because of lithography. Scientists sought the best artists to delineate their discoveries and illustrate their reports. The nineteenth century was also a time of scientific exploration, when new species were constantly being discovered and brought to European zoological gardens, menageries, museums and scientific societies for study. Exploration and lithography together served to provide us with a beautiful and accurate zoological iconography.

As early as 1817 Sir Thomas Stamford Raffles had planned a zoological society for London; he finally served, for a short time, as the first president of the Zoological Society of London. Papers from the

Society's earliest scientific meetings in 1830 to the present have been regularly published in the **Proceedings**; many of the greatest zoologists presented their findings at the Society's regular meetings. The **Proceedings of the Zoological Society of London** fill 46 linear feet of shelving and are an invaluable primary source for systematic zoologists. In 1848 the phrase "with illustrations" was added to the title page; woodcuts and hand-colored lithographic plates had been added to the published papers.

Such eminent artists as Joseph Wolf, Johann Keulemans, Joseph Smit, Henrik Grönvold, John Jennens, and Paul L. Oudart, as well as illustrations by famous scientists, are to be found within the yellowing pages of the **Proceedings**. Their fame and fortunes grew with the success of the Society's scientists and with the growing interest in and development of the field of zoology. The illustrations in the late 1840's and early 1850's were often unsigned but, as the century wore on, the artists' distinctive signatures and monograms began appearing with greater frequency. The work of many of the illustrators is recognized today as outstanding natural history art; individual plates by **Proceedings** artists, cannibalized from bound volumes, now bring phenomenal prices on the print market. Joseph Wolf, considered the best bird illustrator of the nineteenth century, had a special relationship with the Zoological Society and depicted many of the animals in the Society's Menagerie in a series of "Zoological Sketches," as well as frequently contributing to the **Proceedings**. In fact, it was a frustrating search for a Wolf illustration of a cunning young Society hippopotamus that led to the decision to produce this Index.

This Index was produced from the two sets of the **Proceedings** in the Library of the American Museum of Natural History. The luxury of being able to compare two copies of the plates in one library is a rarity, but when the compilers felt it necessary additional copies were also compared. As an added interest: some, if not all, copies of one set at the American Museum of Natural History once belonged to Sir Richard Owen (1804-1892), director of the British Museum (Natural History), organizer of the Zoological Society's meetings and frequent contributor to the **Proceedings**. Many volumes have marginal notes in Owen's hand.

The compilers of this Index strove to present a reference tool that would help the librarian, zoologist, art historian, and bibliographer to quickly locate the works of natural history artists within the volumes of the **Proceedings**. Full names of artists and their dates are supplied whenever information could

be substantiated. The Sowerby family presented a special problem. The article by R.J. Cleevely, "A provisional bibliography of natural history works by the Sowerby family." J. Soc. Biblphy Nat. Hist. v. 6: 482-559, 1974, was used as the principal source on the Sowerbys. The **Index** is not a guide to scientific literature or nomenclature. We have endeavored to carefully proofread the **Index**, but fear that bleary eyes and endless lists of scientific names for butterflies, beetles and shells may have failed us. For typographical errors, we ask the user's indulgence.

## HOW TO USE THIS INDEX

Each full page lithographic plate published in the *Proceedings of the Zoological Society of London* from 1848 through 1900 has been bibliographically described in this work. Photographic process plates, maps, and diagrams have not been included. Arranged by artist, the citations are listed chronologically within each artist's section.

A subject index of common and scientific names as cited for the thousands of species depicted in these plates is provided at the end of this work.

### The Citations

Each citation is composed of the following elements: date and plate number, title of plate (if given), the subject of the plate, a description of and notes on the plate and a citation for the article or articles which the plate illustrates.

The date is given as a year, although before 1861, when the *Proceedings* were still cited as parts, the part number is given followed by the date in parentheses.

The plate number is given in Arabic numerals, although the plates in the *Proceedings* are numbered in the Roman system. The citations for the pre-1861 plates uses the same system used in the *Proceedings*: Annulosa, Aves, Mammalia, etc.

For titled plates (other than those simply listing the scientific name of the species depicted), this title has been given in the citation, in quotes, following the number of the plate.

The scientific names of the species depicted in the plate are listed, in **bold face**, as cited, and in the same order as that found in the description of the plate published with the article. The names may not conform with current usage.

The description and notes section of the citation states if the plate is a lithograph (i.e., uncolored), a hand-colored lithograph or, a chromolithograph. The name of the printer is also given. If the subject or nature of the plate is not obvious from the previous elements, notes have been added to clarify the plate (e.g., "depicts eggs of the species" or "plate shows skeleton only").

For those plates where the artist's name is listed without qualification, or is simply followed by the note "del." (i.e., delineator), no note is given. Any other permutation of a proper name is noted as "plate signed..." followed by a transcription of the form on the plate. This note may include the names of co-artists and/or lithographers. Cross-references have been provided when more than one artist created a plate, with the artist whose name is listed first having precedence. Cross-references are not provided for lithographers.

The note "signed" concerns those plates in which the illustration itself bears the signature or monogram of the artist. This note should not be confused with "plate signed" which concerns the names presented on the margin of the plate.

Finally, the accompanying article is cited including author, title, year and pagination of the article (or articles) for which the plate was created.

## The Subject Indexes

The scientific names listed in the citations for the plates have been divided into several major taxonomic groups: amphibians and reptiles; birds; fish; fossils (which are also listed in the other sections of the subject index); insects (including separate sub-groups of beetles and butterflies and moths); invertebrates (with a sub-section for shells); and mammals.

At the beginning of most of these subject index sections, some common names are also listed. These common names are only the most obvious, either from the title of the plate or the title or text of the article. These sections of the subject indexes are not comprehensive and should be used only as a quick finding aid. For those users who wish only to find the citations for plates depicting a monkey, pheasant or salmon, this should usually be sufficient.

The scientific names provide the most useful and accurate method of finding plates of a particular species. For those users who are unfamiliar with taxonomic name forms, there are many reference works which will provide cross-indexing from common names. A very comprehensive work of this type is Synopsis and classification of living organisms, edited by Sybil P. Parker (New York: McGraw-Hill, 1982). It should be remembered, however, that some of the names listed in the subject index may no longer be currently used by zoological taxonomists. Synonomies for some zoological taxa are available, and the incidence of type specimens illustrated in the Proceedings greatly increases the user's chances of finding a reference to the original name as given in this Index.

Finally, mention should be made of the fact that the "Shells" section of the subject index only includes those species for which the shell was illustrated in a plate. Those species for which the animal was depicted are listed in the "Invertebrates" section.

Reptilia 3

subject: *Iguana rhinolophus*

description and notes: lithograph; printed by Ford & West

article: Tyler, (Lieut.) "On the iguana of Sta. Lucia, *Metopoceros cornutus* of Wagler."  
18:106-110.

Part 19 (1851)

Aves 45

subject: *Didus nazareus*; *Didus solitarius*;  
*Didus ineptus*

description and notes: lithograph; printed by Ford & West; shows metatarsal bones of the three species

article: Bartlett, A.D. "On some bones of *Didus*."  
19:280-284.

Mammalia 29: "Molar tooth of the American tapir,  
section through the crown"

subject: *Tapirus*

description and notes: lithograph; printed by Ford & West

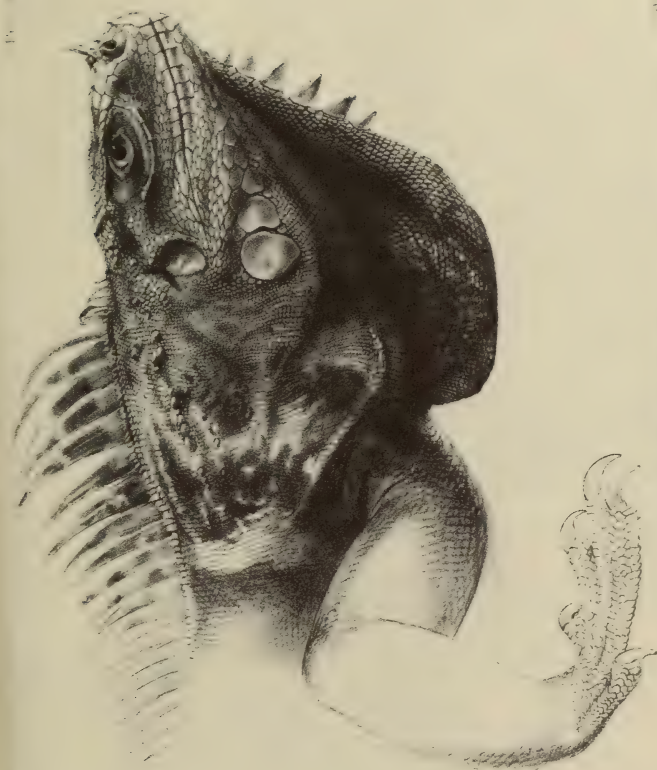

article: Tomes, John. "On the structure of the teeth of the American and Indian *Tapirs*."  
19:121-124.

Radiata 3

subject: *Gonigoria clavata* Gray; *Nidalia occidentalis* Gray

description and notes: lithograph; printed by Ford & West

article: Gray, J.E. "Description of a new genus of *Gorgoniadae*." 19:124-125.

## Annulosa 21

see Scott, H.

## Part 22 (1854)

## Mollusca 29

subject: *Mulleria lobata*; *Bulimus bivaricosus*  
Gask

description and notes: hand-colored lithograph;  
printed by Ford & West; four of six figures not  
colored; includes enlarged views of *Mulleria*  
*lobata* apices for detail

article: Gray, John Edward. "On the genus  
*Mulleria*, Sowerby, or *Acostaea*, d'Orbigny."  
22:129-130.

## Part 21 (1853)

## Annulosa 30

subject: *Ascaris laevissima* Baird.; *Mermis*  
*rigidus* Baird.; *Gordius violaceus* Baird.;  
*Gordius pustulosus* Baird.; *Gordius sphaerura*  
Baird.; *Gordius fasciatus* Baird.; *Pentastoma*  
*annulatum* Baird.

description and notes: lithograph; printed by Ford  
& West

article: Baird, W. "Description of some new species  
of Entozoa from the collection of the British  
Museum." 21:18-25.

## Annulosa 31

subject: *Taenia calva* Baird.; *Taenia zederi*  
Baird.; *Taenia falciformis* Baird.;  
*Bothriocephalus antarcticus* Baird.

description and notes: lithograph; printed by Ford  
& West

article: Baird, W. "Description of some new species  
of Entozoa from the collection of the British  
Museum." 21:18-25.

## Reptilia 7

subject: *Ambystoma californiense* Gray

description and notes: lithograph; printed by Ford  
& West

article: Gray, J.E. "On a new species of salamander  
from California." 21:11.

## Part 23 (1855)

## Aves 78

subject: *Pterocles exustus*; *Pterocles quadricinctus*

description and notes: hand-colored lithograph; printed by W. West; illustration shows eggs only for both species

article: Burgess, (Lieut.) "Notes on the habits of some Indian birds." 23:27-32.

## Mammalia 40

subject: *Bos arnee* H. Smith

description and notes: lithograph; printed by Ford & West

article: Gray, J.E. "Notice of the horns and skull of the arnee." 23:17-18.

## Reptilia 8

subject: *Corucia zebrata* Gray

description and notes: lithograph; printed by W. West

article: Gray, J.E. "New genus of fish-scaled lizards (*Scissosarae*), from New Guinea." 23:217-218.

## Part 24 (1856)

## Annulosa 39

subject: *Papilio (Ornithoptera) victoriae* G.R. Gray

description and notes: hand-colored lithograph; printed by W. West

article: Gray, G.R. "On a new species of lepidopterous insect." 24:7-8.

## Annulosa 40

subject: *Tragocephala comitessa*; *Tragocephala chevrolatii*; *Tragocephala ducalis*; *Tragocephala gemmaria*; *Tragocephala guerinii*; *Deucalion wollastoni*; *Moneilema albopictum*; *Anisocerus onca*; *Anisocerus capucinus*; *Anisocerus dulcissimus*; *Phaedinus xanthomelas*; *Phoebe concinna*; *Agelasta callizona*; *Agelasta amica*; *Agelasta newmanni*

description and notes: hand-colored lithograph; printed by W. West

article: White, Adam. "Description of some coleopterous insects in the collection of the British Museum, hitherto apparently unnoticed." 24:8-17.

## Annulosa 41

- subject: *Trigonophorus hookeri* [male and female];  
*Stethodesma servillei*; *Clinteria ducalis*;  
*Clinteria hoffmeisteri*; *Cetonia procera*;  
*Schizorhina idae*; *Schizorhina bassii*;  
*Schizorhina emilia*; *Cetoma schaumii*  
description and notes: hand-colored lithograph;  
printed by W. West  
article: White, Adam. "Description of some  
coleopterous insects in the collection of the  
British Museum, hitherto apparently unnoticed."  
24:8-17.

## Mammalia 42

- subject: *Furipterus caeruleus* Tomes  
description and notes: hand-colored lithograph;  
illustrations of anatomical details not in  
color; printed by W. West  
article: Tomes, Robert F. "On three genera of  
*Vespertilionidae*, *Furipterus*, *Natalus* and  
*Hyonycteris*, with the descriptions of two new  
species." 24:172-181.

## Mammalia 43

- subject: *Natalus stramineus* Gray  
description and notes: hand-colored lithograph;  
illustrations of anatomical details not in  
color; printed by W. West  
article: Tomes, Robert F. "On three genera of  
*Vespertilionidae*, *Furipterus*, *Natalus* and  
*Hyonycteris*, with the descriptions of two new  
species." 24:172-181.

## Mollusca 34

- subject: *Haliotis albicans* Var.  
description and notes: lithograph; printed by W.  
West  
article: Gray, John Edward. "On a monstrosity of  
*Haliotis (albicans?)*." 24:147-149.

## Reptilia 9

- subject: *Testudo elongata* Gray  
description and notes: lithograph; printed by W.  
West; illustration shows dorsal shell only  
article: Gray, J.E. "Notice of some Indian  
tortoises (including the description of a new  
species presented to the British Museum by  
Professor Oldham)." 24:181-183.

## Reptilia 9a

subject: *Testudo elongata* Gray  
description and notes: lithograph; printed by W. West; illustration shows ventral shell only  
article: Gray, J.E. "Notice of some Indian tortoises (including the description of a new species presented to the British Museum by Professor Oldham)." 24:181-183.

## Reptilia 10

subject: *Batagur ocellata* Gray  
description and notes: lithograph; printed by W. West; illustration shows dorsal shell only  
article: Gray, J.E. "Notice of some Indian tortoises (including the description of a new species presented to the British Museum by Professor Oldham)." 24:181-183.

## Reptilia 10a

subject: *Batagur ocellata* Gray  
description and notes: lithograph; printed by W. West; illustration shows ventral shell only  
article: Gray, J.E. "Notice of some Indian tortoises (including the description of a new species presented to the British Museum by Professor Oldham)." 24:181-183.

## Reptilia 11

subject: *Lepidosiren annectens*  
description and notes: lithograph; folding plate; printed by W. West  
article: Gray, J.E. and A.D. Bartlett.  
"Observations on a living African *Lepidosiren* in the Crystal Palace, accompanied by a note from Mr. A.D. Bartlett." 24:342-348.

## Reptilia 12

subject: *Chelodina expansa*  
description and notes: lithograph; printed by W. West; shows dorsal shell only  
article: Gray, J.E. "Description of a new species of *Chelodina* from Australia." 24:369-371.

## Reptilia 12a

subject: *Chelodina expansa*  
description and notes: lithograph; printed by W. West; shows ventral shell only  
article: Gray, J.E. "Description of a new species of *Chelodina* from Australia." 24:369-371.

## Part 25 (1857)

## Annulosa 44

subject: *Pieris nama* Moore [male and female];  
*Pieris seta* Moore; *Pieris sanaca* Moore;  
*Pieris indra* Moore; *Pieris durvasa* Moore  
[female]  
description and notes: hand-colored lithograph;  
printed by W. West  
article: Moore, Frederic. "Descriptions of some new  
species of lepidopterous insects from northern  
India." 25:102-104.

## Annulosa 45

subject: *Papilio janaka* Moore  
description and notes: hand-colored lithograph;  
printed by W. West  
article: Moore, Frederic. "Descriptions of some new  
species of lepidopterous insects from northern  
India." 25:102-104.

## Annulosa 46

subject: *Pentastoma multicinctum* Harley;  
*Pentastoma polyzonum* Harley  
description and notes: lithograph; printed by W.  
West  
article: Harley, George. "On the anatomy of a new  
species of *Pentastoma* found in the lung and  
air-sac of an Egyptian cobra." 25:115-122.

## Annulosa 47

subject: *Pentastoma multicinctum* Harley  
description and notes: lithograph; printed by W.  
West; illustration shows ova in different stages  
of development  
article: Harley, George. "On the anatomy of a new  
species of *Pentastoma* found in the lung and  
air-sac of an Egyptian cobra." 25:115-122.

## Annulosa 48

subject: *Lineus beattiae* Gray  
description and notes: lithograph; printed by W.  
West  
article: Gray, John E. "Notice of a large species  
of *Lineus*?, taken on the coast near Montrose."  
25:210.

## Mammalia 51

subject: *Manatus vogelii*? Owen  
description and notes: lithograph; printed by W.  
West  
article: Baikie, Balfour. "On the skull of a  
*Manatus* from western Africa." 25:29-33.

## Mammalia 53

subject: *Scotophilus tuberculatus* Forster sp.  
description and notes: hand-colored lithograph;  
printed by W. West  
article: Tomes, Robert F. "On two species of bats  
inhabiting New Zealand." 25:134-142.

## Mammalia 54

subject: *Mystacina tuberculata* Gray  
description and notes: hand-colored lithograph;  
printed by W. West; illustration includes some  
detail figures (not in color) showing dentition,  
skull and mouth  
article: Tomes, Robert F. "On two species of bats  
inhabiting New Zealand." 25:134-142.

## Mollusca 39

subject: *Furcella gigantea*; *Chaena annulata*;  
*Chaena tessellata*  
description and notes: lithograph; printed by W.  
West  
article: Gray, John Edward. "Observations on the  
genus *Gurcella*, Oken, a conchifer without  
concha or normal valves, and on the genera  
*Teredo* and *Chaena*." 25:243-248.

## Pisces 6

subject: *Siphonognathus argyrophanes* Richardson  
description and notes: lithograph; printed by W.  
West  
article: Richardson, John. "On *Siphonognathus*, a  
new genus of *Fistularidae*." 25:237-240.

## Radiata 6

subject: *Antipathes spiralis*?  
description and notes: lithograph; printed by W.  
West; illustration shows views of the coral  
reduced, natural size, inside and the outside of  
the bark magnified  
article: Gray, J.E. "On the animal and bark of the  
genus *Antipathes*." 25:113-114.

## Radiata 7

subject: *Nidalia occidentalis* Gray  
description and notes: lithograph; printed by W.  
West  
article: Gray, John Edward. "Description of a new  
genus of *Gorgoniadae*." 25:128-129.

## Radiata 8

subject: *Sarcogorgia phidippus* Gray  
description and notes: lithograph; printed by W.  
West  
article: Gray, John Edward. "Description of new  
genera of *Gorgoniadae*." 25:158-159.

## Radiata 9

subject: *Hyalonema mirabilis* Gray

description and notes: lithograph; printed by W. West

article: Gray, John Edward. "Synopsis of the families and genera of axiferous zoophytes or barked corals." 25:278-294.

## Part 26 (1858)

## Annulosa 49

subject: *Neptis pata* Moore; *Neptis antara* Moore; *Neptis narayana* Moore; *Neptis amba* Moore; *Neptis columella* Cram. [male and female]; *Neptis soma*; *Neptis ida* Moore; *Neptis duryodana* Moore

description and notes: hand-colored lithograph; printed by W. West

article: Moore, Frederic. "Monograph of the Asiatic species of *Neptis* and *Athyma*, two genera of diurnal Lepidoptera belonging to the family Nymphalidae." 26:3-20.

## Annulosa 50

subject: *Neptis shepherdii* Newm.; *Athyma bahula* Moore; *Athyma reta* Moore; *Athyma kresna* Moore; *Athyma nefte* [male and female]; *Athyma inara* Bd. [male and female]; *Athyma abiasa* Moore

description and notes: hand-colored lithograph; printed by W. West

article: Moore, Frederic. "Monograph of the Asiatic species of *Neptis* and *Athyma*, two genera of diurnal Lepidoptera belonging to the family Nymphalidae." 26:3-20.

## Annulosa 51

subject: *Athyma subrata* Moore [female]; *Athyma kanwa* Moore; *Athyma idita* Moore; *Athyma illigera* Esch.; *Athyma dama* Moore; *Athyma kasa*; *Athyma gutama* Moore

description and notes: hand-colored lithograph; printed by W. West

article: Moore, Frederic. "Monograph of the Asiatic species of *Neptis* and *Athyma*, two genera of diurnal Lepidoptera belonging to the family Nymphalidae." 26:3-20.

## Annulosa 52

subject: *Hedruris siredonis*; *Hedruris androphora*; *Leptodera elongata*

description and notes: lithograph; printed by W. West; figure shows only the tail of *Hedruris androphora*

article: Baird, W. "Description of two new species of entozoa." 26:224-225.

Aves 144: "Egg of the Mooruk, *Casuarus bennettii*"

subject: *Casuarus bennettii*

description and notes: hand-colored lithograph; printed by W. West

article: Gray, J.E. "Note on the egg of 'The Mooruk' (*Casuarus bennettii*, Gould), from New Britain, in the British Museum." 26:271-272.

## Mammalia 60

subject: *Vespertilio formosus* Hodgs.?

description and notes: hand-colored lithograph; printed by W. West; illustration includes details (not colored) of head and ear

article: Tomes, Robert T. "On the characters of four species of bats inhabiting Europe and Asia, and the description of a new species of *Vespertilio* inhabiting Madagascar." 26:78-90.

## Mammalia 65

subject: *Miniopteris schreibersii* Natt. sp.; *Miniopteris blepotis* Temm. sp.

description and notes: lithograph; printed by W. West; figures show heads, skulls, dentitions and ear and wing bone structure

article: Tomes, Robert F. "A monograph of the genus *Miniopteris*." 26:115-128.

## Mammalia 66

subject: *Kerivoula aerea* Tomes; *Kerivoula lanosa* Smith sp.

description and notes: hand-colored lithograph; printed by W. West; illustrations show details (not colored) of heads, skulls and upper jaws

article: Tomes, Robert F. "A monograph of the genus *Kerivoula*." 26:322-338.

## Mollusca 41

subject: *Stavelia torta* Gray; *Hyria lanceolata*

description and notes: lithograph; printed by West & Co.

article: Gray, J.E. "On a new genus of Mytilidae, and on some distorted forms which occur among bivalve shells." 26:90-92.

## Radiata 10

- subject: *Aphroceras alcicornis* Gray; *Zoanthus couchii* Johnston; *Sidisia barleei* Gray  
description and notes: lithograph; printed by W. West; color printed on as background to one figure only  
article: Gray, J.E. "Description of *Aphroceras*, a new genus of calcareous Spongiadae brought from Hong-Kong by Dr. Harland." 26:113-114 [and] Gray, J.E. "On the *Dysidea papillosa* of Dr. Johnston." 26:531-532 [and] Holdsworth, E.W.H. "On *Zoanthus couchii*, Johnston." 26:557-560.

## Radiata 11

- subject: *Aphrocallistes beatrix* Gray  
description and notes: lithograph; printed by W. West; species shown natural size and magnified  
article: Gray, John Edward. "On *Aphrocallistes*, a new genus of Spongiadae from Malacca." 26:114-115.

## Radiata 12

- subject: *Xenospongia patelliformis* Gray  
description and notes: lithograph; printed by W. West; plate shows juvenile, adult and details of structure  
article: Gray, John Edward. "Description of a new genus of sponge (*Xenospongia*) from Torres Strait." 26:229-230.

## Reptilia 13

- subject: *Mitylia gerrardi* Gray  
description and notes: lithograph; printed by W. West  
article: Gray, J.E. "Notice of a new genus of Uropeltidae from Ceylon, in the collection of the British Museum." 26:57-58.

## Reptilia 14

- subject: *Calabaria fusca* Gray  
description and notes: lithograph; printed by W. West  
article: Gray, J.E. "Description of a new genus of Boidae from old Calabar, and a list of w. African reptiles." 26:154-167.

## Reptilia 15

- subject: *Argalia olivacea*; *Riama unicolor*  
description and notes: lithograph; printed by W. West  
article: Gray, John Edward. "Description of *Riama*, a new genus of lizards, forming a distinct family." 26:444-446.

## Part 27 (1859)

## Annulosa 56

subject: *Taenia sulciceps* Baird; *Ascaris halichoris* Owen  
description and notes: lithograph; printed by W. West; includes views of anatomical details  
article: Baird, W. "Description of a new species of *Taenia*." 27:111. [and] Baird, W. "Description of a rare entozoon from the stomach of the dugong." 27:148-149.

## Annulosa 58

subject: *Platysma sturtii*; *Platysma flindersii*; *Catadromus elseyi*; *Oryctes mulleranus*; *Aulacopris reichi*; *Distichocera thomsonella*; *Schizorhina bakewellii*; *Diaphonia metallescens*  
description and notes: hand-colored lithograph; printed by W. West; includes details (uncolored) of heads  
article: White, Adam. "Descriptions of unrecorded species of Australian Coleoptera of the families Carabidae, Buprestidae, Lamellicornia, Longicornia, etc." 27:117-123.

## Annulosa 59

subject: *Chrysodema louisa*; *Stigmodera gulielmi*; *Stigmodera parallela*; *Stigmodera bakewellii*; *Temognatha imperatrix*; *Zopherosis georgii*; *Rhytiphora amicula*; *Platymopsis armatula*  
description and notes: hand-colored lithograph; printed by W. West; includes lateral views (uncolored) of torsos  
article: White, Adam. "Descriptions of unrecorded species of Australian Coleoptera of the families Carabidae, Buprestidae, Lamellicornia, Longicornia, etc." 27:117-123.

## Annulosa 60

subject: *Trypanophora semihyalina* [male and female]; *Syntomis marsdeni* Moore; *Syntomis vigorsi* Moore; *Syntomis pfeifferae* Moore; *Syntomis wallacii* Moore; *Syntomis penangae* Moore; *Syntomis rafflesi* Moore; *Syntomis walkeri* Moore; *Syntomis pravata* Moore; *Syntomis crawfurdi* Moore; *Syntomis cantori* Moore; *Phalanna horsfieldi* Moore; *Phauda mahisa* Moore  
description and notes: hand-colored lithograph; printed by W. West  
article: Moore, Frederic. "Descriptions of some Asiatic lepidopterous insects belonging to the tribe Bombyces." 27:197-200.

## Annulosa 64

subject: *Antheraea royliei* Moore; *Antheraea helferi* Moore  
description and notes: hand-colored lithograph;  
printed by W. West  
article: Moore, Frederic. "Synopsis of the known Asiatic species of silk-producing moths, with descriptions of some new species from India." 27:237-270.

## Annulosa 65

subject: *Antheraea frithi* Moore; *Saturnia grotei* Moore; *Attacus guerini* Moore  
description and notes: hand-colored lithograph;  
printed by W. West  
article: Moore, Frederic. "Synopsis of the known Asiatic species of silk-producing moths, with descriptions of some new species from India." 27:237-270.

## Annulosa 68

subject: *Papilio croesus* [female]  
description and notes: hand-colored lithograph;  
printed by W. West; gives dorsal and ventral views  
article: Gray, George Robert. "On a new species of the family Papilionidae from Batchian." 27:424-425.

## Annulosa 69

subject: *Papilio croesus* [female]  
description and notes: hand-colored lithograph;  
printed by W. West; gives dorsal and side views  
article: Gray, George Robert. "On a new species of the family Papilionidae from Batchian." 27:424-425.

## Mammalia 67

subject: *Notopteris macdonaldii* Gray  
description and notes: hand-colored lithograph;  
printed by W. West; also shows detail (uncolored) of skull  
article: Gray, John Edward. "Notice of *Notopteris*, a new genus of Pteropine bat from the Feejee Islands." 27:36-38.

## Mammalia 68

subject: *Arctocephalus ursinus*  
description and notes: lithograph; printed by W. West  
article: Gray, (Dr.) "On the sea bear of Foster, the *Ursus marinus* of Steller, *Arctocephalus ursinus* of authors." 27:102-103.

## Mammalia 69

subject: *Arctocephalus delalandii*

description and notes: lithograph; printed by W. West

article: Gray, J.E. "On the eared seal of the Cape of Good Hope (*Otaria delalandii*).\" 27:107-110.

## Mammalia 70

subject: *Arctocephalus gillespii*

description and notes: lithograph; printed by W. West

article: Gray, J.E. "On the eared seal of the Cape of Good Hope (*Otaria delalandii*).\" 27:107-110.

## Mammalia 72

subject: *Arctocephalus monteriensis*

description and notes: lithograph; printed by W. West

article: Gray, J.E. "On the sea-lions, or lobos marinos of the Spaniards, on the coast of California.\" 27:357-361.

## Mollusca 45

subject: *Voluta mamilla*

description and notes: hand-colored lithograph; printed by W. West

article: Gray, J.E. "Description of the adult stage of *Voluta mamilla*, Gray.\" 27:34-36.

## Mollusca 48

subject: *Scapha maria-emma*

description and notes: hand-colored lithograph; printed by W. West; plate shows dorsal view and ventral view (not colored)

article: Gray, J.E. "Description of *Scapha maria-emma*, a new species of volute.\" 27:230-231.

## Pisces 7

subject: *Haliicthys taeniophora*

description and notes: lithograph; printed by W. West

article: Gray, John Edward. "Notice of a new genus of Lophobranchiate fishes from Western Australia.\" 27:38-39.

## Pisces 9

subject: *Glyphisodon biocellatus*; *Haligenes tristrami* Gthr.

description and notes: hand-colored lithograph; printed by W. West; only first species in color

article: Bennett, George. "On the fish called *Glyphisodon biocellatus*." 27:222-223. [and] Günther, A. "On the reptiles and fishes collected by the Rev. H. B. Tristram in northern Africa." 27:469-474.

## Radiata 15

subject: *Macandrewia azorica*

description and notes: lithograph; printed by W. West

article: Gray, J.E. "Description of *Macandrewia* and *Myliusia*, two new forms of sponges." 27:437-440.

## Radiata 16

subject: *Myliusia callocyathes*

description and notes: lithograph; printed by W. West

article: Gray, J.E. "Description of *Macandrewia* and *Myliusia*, two new forms of sponges." 27:437-440.

## Reptilia 16

subject: *Callophis intestinalis* var. Philipp; *Callophis intestinalis* var. Javan; *Callophis intestinalis* var. Malayan; *Callophis maculiceps* Gthr.; *Callophis trimaculatus* Gthr.

description and notes: lithograph; printed by W. West

article: Günther, A. "On the genus *Elaps* of Wagler." 27:79-89.

## Reptilia 17

subject: *Callophis univirgatus* Gthr.; *Vermicella occipitalis* D.B.

description and notes: lithograph; printed by W. West

article: Günther, A. "On the genus *Elaps* of Wagler." 27:79-89.

## Reptilia 18

subject: *Elaps decoratus* Jan.; *Elaps filiformis* Gthr.

description and notes: hand-colored lithograph; printed by W. West

article: Günther, A. "On the genus *Elaps* of Wagler." 27:79-89.

## Reptilia 19

- subject: *Cynops chinensis* Gray; *Plethodon persimilis* Gray  
description and notes: lithograph; printed by W. West  
article: Gray, J.E. "Descriptions of new species of salamanders from China and Siam." 27:229-230.

## Reptilia 20

- subject: *Cercosaurus rhombifer* Gthr.; *Liocephalus iridescent* Gthr.; *Lachesis nitidus* Gthr.  
description and notes: hand-colored lithograph; printed by W. West; *Cercosaurus rhombifer* not colored  
article: Günther, A. "Second list of cold-blooded Vertebrata collected by Mr. Fraser in the Andes of Western Ecuador." 27:402-420.

## Reptilia 21

- subject: *Geoclemmys macrocephala*  
description and notes: lithograph; printed by W. West  
article: Gray, J. Edward. "Description of a new species of freshwater tortoise from Siam." 27:478-479.

## Part 28 (1860)

## Mammalia 75

- subject: *Epomophorus franqueti*  
description and notes: hand-colored lithograph; printed by W. West; plate incorrectly gives name as *Epomophorus francqueti*  
article: Tomes, Robert F. "A monograph of the genus *Epomophorus*, with the description of a new species." 28:42-58.

## Pisces 10

- subject: *Pimelodus cinerascens* Gthr.; *Pimelodus elongatus* Gthr.; *Pimelodus modestus* Gthr.
